

# BUILDING CONSTRUCTION TECHNOLOGY

## SUCCESS BEGINS HERE

### PURPOSE OF PROGRAM

The building construction technology program provides entering students with current and realistic training in: the tools of the carpentry trade, the methods of proper construction, the proper materials to use, and the related knowledge necessary to enter the trade. First year students learn and practice the uses and safety of power and hand tools. The principles of building construction are practiced and include: roof framing, roof trusses, floor framing, wall partition framing, exterior finish, roofing, siding, and insulation. Second year students supplement their trade skills by learning and practicing interior finishes, kitchen cabinets, painting, and staining. Students also learn building science theory, especially as it pertains to sustainable construction practices.

**Students learn in a lab with all of the industry standard tools necessary to become competent in their trade.**

### CAREER OPPORTUNITIES

Graduates of the building construction technology program will be qualified as entry level builders and may find employment with:

- building suppliers
- government agencies
- home specialty companies
- manufacturing firms
- and more!

The associate degree level program may lead to advanced positions as general construction supervisors or contractors.

**Employees in the building trades are in high demand.**
