

NURSING

SUCCESS BEGINS HERE

PROGRAM PURPOSE

NMCC's Nursing program is designed to prepare students to become registered nurses. Students develop the necessary knowledge and skills to provide nursing care in various capacities throughout a patient's lifetime. Guided learning opportunities in local hospitals, the campus lab, and state-of-the-art simulation center, provide students with valuable hands-on experiences that compliment the classroom curriculum.

Candidates who are graduates from approved practical nursing programs are provided an opportunity for advanced standing. Students with successful prior college courses may receive priority, providing all other minimum standards are met. Students may be given only one opportunity to reenter the program after having failed to complete it previously.

NMCC Nursing graduates are eligible to take the NCLEX-RN exam.

CAREER OPPORTUNITIES

Graduates will find employment opportunities in a variety of health care settings. Nurses are integral members of the health care team and will function under direct or indirect supervision of a registered nurse with more experience or education.

For graduates who opt to continue in their professional development by pursuing their bachelor of science in nursing degree, NMCC has transfer agreements in place with four-year institutions. By completing the first two years at NMCC, students are able to graduate with less debt and are prepared to take advantage of online programs.

Nursing is a prolific career. It is a high demand field with many opportunities for advancement and specialization.
