YOUR CAREER AS A LOGGER

Training will provide an extensive overview of common mechanical systems found in modern timber harvesting equipment, with an understanding of the variables of timber growth and tree species. A strong emphasis on safety training will be provided. Courses include hands-on experience within the forest environment. Skills learned in this dynamic environment will prepare you for the operations of the most current equipment available, to help you begin your career as a professional in the logging industry.

MECHANIZED LOGGING OPERATIONS

NORTHERN MAINE COMMUNITY COLLEGE

Updated 3/21

QUALITY TRAINING

This program was created by three Maine Community Colleges in partnership with the Professional Logging Contractors of Maine (PLC). The logging industry has many positions available for skilled operators of current mechanized logging equipment. This program is designed to get you started in your career by providing the training necessary to be a highly skilled equipment operator, and be a part of a safe, production-oriented harvesting team.

Professional Logging Contractors of Maine

TRAINING INCLUDES

- Harvesting laws, environmental regulations and practices pertaining to forestry, boundary lines, basal areas and vernal pools.
- Information on Maine's forest economy, which will include marketing, utilization, equipment, logging techniques and more.
- Basic maintenance and repair of equipment.
- Safe operations of the most current equipment available.
- Industry-recognized safety certifications and demonstration of competency of all required logging operation safety standards.
- A cooperative team approach towards mechanical forest operations to accomplish the goals of selection, harvesting, transporting for delivery to markets.

ADMISSION

- Personal interview
- Valid Maine driver's license and a review of your driving record*
- High School diploma or GED
- Immunization record/proof of: MMR or titer indicating immunity; Diphtheria/tetanus given in the past 10 years
