

INFLUENCING THE FUTURE

2019 ANNUAL REPORT

Welcome

Message From The President

In preparing these comments, I reviewed the annual report from 2008-2009. The theme for that year was "Making a Difference." It was interesting to look back only ten years and be reminded of the impact being made by NMCC and our partners in workforce development, sustainability, leadership opportunities and community support, at that time.

Now, fast-forward ten years to this 2018-2019 Annual Report. As you review this document you will certainly note that NMCC does more than just make a difference, our work is influencing the future. While the institution continues to impact the categories mentioned above, the College now has a greater role. It is about helping individuals make personal decisions and transformations that will impact their future. It is about working with employers to understand workforce needs and the role NM plays in addressing those needs. It is about providing opportunities for students to explore, experience, and become empowered through engagement. It is about influencing those next steps, which might include continuing their education, becoming a leader in their local community or being a dedicated employee. Most importantly, it is about being a part of the family.

On pages 12 and 13 of this report, you will read the story of how NM made a difference and has influenced the future of three generations of one family. There are many family stories just like this one where NMCC played a role in influencing the future of those we serve.

Tim Crowley
NMCC President

Message from the NMCC Foundation Chair

Serving as Chair of the Northern Maine Community College Foundation for the past two years has been a great honor and a privilege. I'm proud of the work that we have accomplished in that time. Foundation assets have grown thanks to generous donor support. Annual scholarships disbursement increased to over \$116,000 last year. And Foundation funding has helped provide support for the development of new programs and facilities. These investments directly impact students, benefit the business community and supply an educated and skilled workforce to grow Maine's economy. Your continuing support allows NMCC to quickly meet the needs of the student body and workforce while providing the latest technology available.

It is exciting to report that both the Nursing Simulation Center and the Water Treatment Lab are currently in use by our students and industry professionals from across the state. Renovation continues on campus with a significant redesign of Reed Commons now underway.

Connie Sandstrom will assume the role of Foundation Chair, as I complete my term. I am confident that the Foundation will continue its growth under her very capable leadership.

I encourage each of you to visit the campus often, engage with the students and faculty and continue your generous financial support.

Jeff Pangburn
Chair, Northern Maine Community College Foundation

NEW SIMULATION CENTER →

That afternoon, Senator Susan Collins visited the NMCC campus to participate in the ribbon cutting ceremony for the new nursing and allied health simulation center. Collins reminded those in attendance that the five mannequins in the simulation center represent the highest level of technology available in the field of allied health training. Of course, Collins was pleased to share that “northern Maine is leading the way and building the future,” in health care education. The simulation center consists of three simulation rooms, complete with interactive mannequins, and has a control room dedicated for each room.” The simulation center brings students as close to real-world experiences as you can

in a simulated environment,” according to Angela Buck, RN, MSN, FNP-C, Chair of the Nursing and Allied Health Department. “The experiences that students will gain from working with this technology, will be more consistent, efficient and proficient than traditional training,” stated Buck.

On October 12, 2018... *we cut some ribbons*

The water treatment technology program began in the fall of 2018. Then Commissioner of the Maine Department of Environmental Protection, Paul Mercer visited campus to attend the ribbon cutting for the new Water Treatment Technology Program’s lab. NMCC is the only college in Maine to offer an associate degree in water treatment technology, as well as certificates in both water

and wastewater treatment technologies. This program was developed in direct response to a request from the DEP when they express concern about the number of professionals in the field who are expected to retire within the next ten years. During his closing comments, Mercer stated, “This is a shining example of the mission of the community college: identify a need and move towards it. This is a public/private partnership and it really works out well.” Also, on campus for this special event were Nick Archer, the northern Maine Regional Director of the DEP and Robert Rak, Professor and Environmental Science & Technology Coordinator at Bristol Community College in Fall River, Massachusetts., who was instrumental in the development of the curriculum and the designing of the WTT lab.

← NEW WATER TREATMENT TECHNOLOGY LAB

2018/19

NORTH COUNTRY CONFERENCE

In late April, approximately 190 participants took advantage of classes and activities being hosted by the Joint Environmental Training Coordinating Committee in partnership with the Maine Water Environment Association and the Maine Water Utilities Association along with support from Maine DEP's Northern Maine Regional Office. This was the first time the group has met at NMCC the three-day conference. They plan to return in 2021 for their next biennial meeting

CREATIVE WRITERS READING SERIES

In celebration of Community College Month and National Poetry Month, each April, the NMCC Creative Writing class hosts a Creative Writers' Reading Series. Accomplished authors from around the northeast travel to Presque Isle to share their original works with students and interested community members. The visiting authors, for the past academic year were John Corrigan, Diane Les Becquets, and Melanie Brooks. Corrigan is a former English instructor at NM.

SNA CONFERENCE

Focusing on the future of nursing in Aroostook County, the Student Nurses' Association hosted their first conference which drew a crowd of nearly 80 participants. The keynote speakers Lynn King, DNS, RN and Erin Stratton, Ph.D., RN of the American Nurses' Association, spoke on the topic of incivility in nursing. Other professionals in the field were on hand to make presentations. Cary Medical Center served as a co-sponsor of the event.

CAMPUS EVENTS

WELL ELDER TEA

One component of the first-year nursing program is to practice assessment techniques with healthy senior citizens. With assistance from the nursing faculty, students are paired with volunteer senior citizens, who allow students into their homes throughout the semester. The Well Elder Tea is a long-standing tradition and serves as one way of expressing appreciation to the well-elders who have served an integral role in the education of the nursing students.

TOTALLY TRADES

In partnership with New Ventures Maine, NMCC hosted the 15th annual Totally Trades Conference. This day-long event is designed to encourage middle and high school girls to consider a career in fields traditionally filled more predominantly by males. Many NM students and faculty members assisted by presenting hands-on workshops for the approximately 150 students and teachers in attendance.

JOB FAIR

The NMCC Job Fair, has a reputation of being not only the largest in Aroostook County but the one that provides the most diverse opportunity for people looking for that next step in their career. Nearly 70 employers were in attendance seeking skilled workers in a variety of fields and across all education levels. Potential employees had the opportunity to speak with human resource managers regarding full and part time employment, as well as internship opportunities.

BUSINESS DONATIONS

Emera Maine expanded its support of the automotive technology program by providing \$15,000 toward the purchase of an electric vehicle. Over the past few years, Emera has loaned the company's hybrid vehicle for short-term use in the program. The addition of the 2018 Chevy Volt, provides a hybrid vehicle for full-time use on campus. It is planned that the technology will also be utilized by the EMS program for the purpose of teaching emergency medical procedures related to automobile accidents involving an electric vehicle.

For many years, Milton CAT has had a representative serve on the diesel hydraulics program's advisory committee. The commitment was expanded in 2018 when the company donated \$6000 toward the purchase of a 55-ton heavy duty shop press for the diesel hydraulics program.

Briggs Equipment of Gray, Maine donated a unit heater, water-to-water heat pump, and a steam coil to the plumbing and heating department. Instructor Loren Gordon plans to use the coil for silver soldering and the pumps for the air condition and refrigeration program.

Kieffer Insurance contacted donated six computers, ten monitors and three printers to the computer networking technology program. The computers are used by second-year students for the purpose of learning to install LINUX directly onto a machine, rather than the virtual lab experience..

Giving Back

STUDENT SENATE HOLIDAY PARTY

Each December, the Student Senate sponsors a holiday party for the children of NMCC students and staff. All student organizations are invited to host a table for crafts and games. Santa always finds his way from the North Pole to visit and present gifts to the kids in attendance.

POLAR DIP

Brrrrr. Jumping into the icy Atlantic Ocean in March may not be your idea of giving back, but it is for Dean Bill Egeler and the fearless group that he pulls together to participate in the annual Polar Dip to support the Ronald McDonald

House and Sarah's House of Maine. Many Aroostook families use both facilities during hospitalizations in Bangor. Over the past 18 years, the Freez'n Falcons have raised in excess of \$55,000 by jumping into the icy waters.

VISITING HOMESCHOOLERS

Aroostook County home-schooled students, ranging in ages from 5 to 15, visited the biology lab at NM. Life sciences instructor, Trena Soucy, introduced the students to the concept of microbiology and different organisms that can't be seen with the eyes alone. Students performed a few experiments and were given the opportunity to look at different microbes under the microscopes. They also tried growing their own bacteria on petri plates.

EMBARK ANNUAL LUNCHEON

High school students who are undecided about their future are introduced to college opportunities through EMBARK and receive individualized guidance. Those who graduate from NMCC are recognized at an annual luncheon prior to graduation.

LOCAL WORKFORCE TRAINING

Through the work of the Foundation and campus funds, NM provides updated facilities and equipment for training purposes. Many local employers take advantage of these resources. This picture shows members of the Presque Isle Fire Department, upgrading some of their skills in emergency medical services.

New Hires & New Positions

DR. MICHAEL DUNLOP, ACADEMIC DEAN

NMCC recently announced Dr. Michael Dunlop as the new academic dean. For the past five years, Dunlop was a faculty member in the Sawyer Business School at Suffolk University in Boston, MA. Dunlop has previous experience working in community colleges in the state of New Mexico where he held academic teaching positions, as well as administrative positions. Dunlop earned an undergraduate degree in psychology, an MBA, as well as a Doctor of Education degree from New Mexico State University.

NEW LEADERS EMERGE AT NMCC

Angela Buck has been named the new department chair of nursing, simulation, and allied health. Since January 2017 Buck has worked as a nursing instructor at NM. Brian Hall is the new director of financial aid. After serving as assistant director of financial aid for three years, Hall is experienced in helping students receive the assistance necessary to thrive in college. Harold (JR) Kierstead has been named the Academic Success Center coordinator; Kierstead previously held the position of instructional designer.

NEW HIRES

Jessica Lahey is the newest full-time nursing instructor at NM; Lahey began working as an adjunct instructor earlier in 2019 before transitioning to full-time faculty. Lee Griffin has been named the new facilities manager at NM. Griffin spent the last 10 years at Huber Engineered Woods and holds a bachelor's degree in mechanical engineering. Gilles St. Pierre has been named NM's new water treatment technology instructor. For nearly 28 years St. Pierre worked as chief operator of the Presque Isle Sewer District and still oversees the Mapleton Sewer District. Robert Carlson is joining NM as an English instructor. Joining us from Texas, Carlson earned a master's in English from UT Brownsville.

ASE AUTOMOTIVE TECH. ACCREDITATION

In February 2019, the Automotive Technology Program was recognized by the by the National Institute for Automotive Service Excellence (ASE) for continuing to meet the requirements for Master Automobile Service Technology Accreditation. While ensuring quality, accreditation brings a level of credibility, prestige and recognition to any program. According to Pamela Buck, Trade & Tech department chair, "This accreditation is a recognition of NMCC's commitment to teaching excellence in the automotive field."

ALL AWARD WINNERS

Evening of Excellence

On May 1st, NMCC celebrated student achievement during an Evening of Excellence to honor students who exemplify the NMCC experience – both in and out of the classroom. Eighteen students were selected – one from each program area – to receive an Academic Achievement Award. A variety of criteria was used to determine the honorees, including academic performance and attitude.

Erik Lamoreau of Caribou, was congratulated for his Student of the Year distinction. In April a reception was held in Augusta to honor Lamoreau and six other students, one from each of Maine's Community Colleges.

The Falcon Spirit Award was presented to Hunter Graham, Lacie LeGassie, Matthieu Doiron, and Godfrey Ntate. This award recognizes students who have gone above the call of duty to help make the campus a better place.

NMCC's honor society, Phi Theta Kappa, announced the All-Maine Academic Team honorees, Rachel Driscoll and

Maranda Campbell. Each has demonstrated academic excellence, leadership, and community service.

The Award of Excellence was presented to Jessica Jimmo and Justin Barry. This award honors students who have demonstrated high excellence for themselves, are creative thinkers, possess high standards of honesty and integrity, and have been an inspiration to others.

The Instructor of the Year award was determined by student nominations and was presented to Bob Rice, the diesel hydraulics instructor who has been with the college more than 20 years.

STUDENT OF THE YEAR

FALCON SPIRIT AWARD

AWARD OF EXCELLENCE

INSTRUCTOR OF THE YEAR

Transforming One Family's Future Through Education

As the fifth of nine children, April Sarasin grew up believing that college was not an option. "You didn't even think about it," she said. After a career as a school bus driver and custodian, in 2013 April's life changed dramatically when her doctor ordered her to stop working for health reasons. Three of her children were adults at the time, but she still had an 11-year-old son whom she raised as a single parent. "I had worked since the age of fourteen. Now, at the age of 54, I found myself at a crossroad in my life."

April's older daughters, Ashley and Alyssa, encouraged their mom to pursue higher education.

"Going back to school sounded ludicrous to me," April said. "However, my daughters made a convincing argument."

* * *

Years earlier, April's daughter, Ashley Hall, dropped out of high school at 15, having only reached an eighth-grade education. Her late father's struggles with alcoholism left her with low self-esteem, leading to anxiety and depression that limited her ability to participate in school. "It was challenging to find employment as a young adult without education or a degree," Ashley explained.

In her early 20's, after years of feeling held back by her past, Ashley decided she wanted something better for herself. "Although I was scared and unsure I could step back into school, I needed to try," she said. In 2006 Ashley earned her GED and enrolled in NMCC shortly after. Still feeling burdened by her past, Ashley found encouragement from dedicated faculty like David Raymond. "He saw a smart and capable young

woman and he encouraged me to go beyond what I thought was possible. That was because he believed in me, and he was right; I am that smart and capable woman," Ashley said. "That changed my life."

In 2017 Ashley graduated with her master's degree, after earning an associate's degree from NMCC and a bachelor's from UMPI. Ashley is now employed at NMCC as student navigator, helping connect students with the resources they need to succeed.

During her journey Ashley married Brian Hall. After losing two jobs within a year due to layoffs, Brian decided to pursue an education and enrolled in night classes at NMCC without knowing which career path to pursue. "I decided to take an accounting course just to get a feel for it, and I loved it," Brian said. With support from the dean of students Dr. Bill Egeler, Brian declared his major and eventually earned degrees in both accounting and liberal studies. Brian continued his pursuit and now holds both a bachelor's and an MBA and works as the director of financial aid at NMCC. "At NM I learned how to be a successful student and I learned the skills that have since made me successful in my career," Hall explains.

During this same period of time, April's other daughter, Alyssa Levesque, struggled to make ends meet as a young mother with a retail job working nights and weekends. Alyssa enrolled at NM in 2005, but explains that "It was scary. I'd

"Going back to school sounded ludicrous to me; however, my daughters made a convincing argument." ~April Sarasin

(LEFT TO RIGHT) TIM LEVESQUE, ALYSSA LEVESQUE, APRIL SARASIN, ASHLEY HALL AND BRIAN HALL

been out of school for some time and didn't know if I had it in me to be a postsecondary student." She found comfort in the diverse environment and supportive instructors and, spreading out her course load over five years, graduated in 2010. Alyssa continued on to earn her bachelor's from Husson and now works as the human resources manager at ACAP.

Alyssa's husband, Tim Levesque also overcame challenges to achieve his education. Being the first person in his immediate family to graduate high school, Tim believed he could never afford college and worked in telemarketing and food service. Through the dedication and persistence of Tammy Nelson, now the director of counseling at NM, Tim realized the options available to him through the community college system. "NMCC's guidance department opened up avenues that I never knew existed, and set me on the path that led me to where I am today," Tim said. Following his interest in computers and technology, Tim

now has a master's degree in information security and works as a systems engineer at MMG.

* * *

After being out of school for 35 years, April Sarasin enrolled in the liberal studies program at NMCC. Ashley and Brian helped her complete the paperwork. "I was really hesitant about the idea of becoming a student," April confessed. "But I saw the positives in my girls. I doubted that I could do it, but I needed to find something new to do. With their encouragement, I took that first step."

April graduated from NM in 2017 and is now enrolled at UMPI pursuing a bachelor's in English; she's discovered an interest in poetry and short stories. "For me, it's about the accomplishment. If it wasn't for my kids and the professors, I would never ever have gotten this far," said April. "I have no regrets of doing this. I turned something practical into something personal, and that's why I won't give up. I don't know where it will take me."

The work of the

Foundation

To quote the Foundation's mission statement "...to expand the educational opportunities for students to enroll at Northern Maine Community College." As the chart on the left indicates, through your support, the Foundation has continued to stay focused on finding ways to benefit students. The Foundation's Executive Committee set a goal of providing \$100,000 in scholarship funding for the 2018-2019 academic year. Because of your continuing support we were able to surpass that goal by approximately \$16,000. On behalf of the students who are the beneficiaries of your dedication, THANK YOU!

2018 Awards Dinner

The Foundation's annual dinner is always an evening of excitement, celebration, sharing and recognition. Excitement while hearing from students who have benefited from the work of the Foundation; celebrating the successful completion of another fiscal year that saw growth in donations and scholarship recipients; completion of projects and the announcement of new projects.

These accomplishments were outlined by Foundation Chair, Jeff Pangburn during his comments to those in attendance. During the reception time, guests had the opportunity to

visit with each other and to interact with HAL the new high-fidelity pediatric mannequin used for instruction in the nursing and allied health simulation center. EMS and nursing students demonstrated HAL's many features and shared the importance of such technology in education.

The final celebration of the evening was the presentation of the Eagle Award to David Raymond, Department Chair for Arts and Sciences. Raymond has been a faculty member at NMCC for almost 30 years and recently led the College through the accreditation self-study process, as one of the co-chairs.

FRED BUSTARD

September 2018, the NMCC Foundation lost one of its founding members, Frederick "Fred" C. Bustard. A County native, Fred returned to Aroostook County after his service in the United States Army. He worked for 42 years at Maine Public Service, retiring as Vice President of Operations. During the 2018 Annual Dinner, a donation of \$10,000, was given in memory of Fred. The presentation, was made by Joseph Bustard on behalf of Fred's children: Joseph, Karen Crandall and Daniel Bustard.

The donation was added to the Bustard-Carlson Scholarship Fund, established in 2000.

TD BANK GOLF TOURNAMENT

With dark clouds looming overhead, the 2018 TD Bank Golf Tournament to benefit the NMCC Foundation, continued as planned. The 13th annual tournament included a day on the course, a dinner and auction. The proceeds from the day and the wonderful support from sponsors who provided items for both the live and silent auction, assisted in raising approximately \$19,000 for the Foundation.

"The tournament has provided a wonderful opportunity to get together with our clients and others in the community for a day of fun and support of NMCC students," stated Jeff Pangburn, Vice President for Commercial Services for TD Bank.

HUNTER GRAHAM

Last year Hunter began working under residential life director Jon Blanchard as the residential life secretary. Additionally, Hunter is a resident advisor (RA) in the dorms on campus and the current Student Senate President. In his work-study role, Hunter has developed office skills, organized data, built relationships around campus and improved at using Excel. Shortly after graduating high school Hunter discovered an interest in accounting and is now pursuing both an accounting degree and entrepreneurship certificate and is expecting to graduate in Spring 2020.

AS WAGES INCREASE, FUNDING REMAINS STEADY

Approximately 80% of students who attend NMCC qualify for federal financial aid. Many of those students count on the possibility of a work study job as a means to meeting some financial obligations. Since 2014, the minimum wage has increased from \$7.50 to \$12.00. During this same five-year period, the federal work study allocation has remained the same, therefore causing a gap between the need for work study jobs and the access, due to the lack of available funding. The Foundation continues to ask for your assistance in helping fill this gap.

AMBER IVEY

This fall Amber began a work-study role in the NMCC library, where she assists visitors with computers and printing, puts away books, helps students locate books, and operates the circulation desk. Last summer Amber did a job shadow at Houlton Regional Hospital and found an interest in medical coding, so she decided to pursue her degree at NM. As a first-year student Amber's favorite aspect of her chosen path is the organizational aspects involved. Although no students have asked for book recommendations yet, Amber is a fan of the James Patterson series *Maximum Ride* about a mutant family saving the world.

NMCC celebrated the graduation of nearly 190 students during the 54th Commencement Exercises on Saturday, May 11, 2019. Dr. David Daigler, President of the Maine Community College System was in attendance to offer words of wisdom and congratulations to the students. Erik Lamoreau, NMCC Student of the Year, delivered a touching presentation to his fellow graduates.

Pinning Ceremony
Class of 2019

MCCS PRESIDENT DAVID DAIGLER

PRESIDENT'S AWARD ➔

A highlight of the event was the presentation of the President's Award to Dr. Beth Ann Collamore for her outstanding dedication to the emergency medical services program at NM. Kris Doody, Cary Medical Center CEO assisted Crowley with the presentation.

Northern Maine Community College
2019
President's Award
Presented to
Dr. Beth Ann Collamore
In recognition of
your unwavering dedication to
Emergency Medical Services for NMCC,
Penobscot County and Maine.
Dr. Collamore contributed to
the establishment of a
nationally accredited EMT program
at NMCC and continues to work
with students during clinical rotations.
As the program's medical director she
works with instructors in the updating
of curriculum to meet medical practice.

TORCHBEARERS AWARD

Mark Bouchard was the recipient of the Alumni & Friends Organization's Torchbearer Award in 2018. Bouchard has been a member of the organization since its inception. He has served as a board member and has held several offices. He served as president of the organization in 2015-2016. Bouchard continues to serve as a member of the executive committee.

The Organization also supports the College by volunteering to assist with **Open House**, the **TD Bank Golf Tournament**, graduation and by sponsoring **BINGO** for the students the night before the **Alumni Weekend**.

On the morning of graduation, the Alumni & Friends Organization sponsored a gathering for members of the Class of 1968. Two people in attendance were Richard Cilley and Dan Bridgham. In 1968, Cilley was serving as the assistant director and Bridgham was a drafting instructor.

TUITION RAFFLE

Each year the Alumni and Friends Organization sponsors a Tuition Raffle as a fundraiser; however, most of the funds are immediately spent on students. One lucky full-time student becomes the winner of 24 credit hours of free-tuition. The second-place prize is a \$250 gift card to the College Bookstore.

Madalyn Caron is pictured with the textbooks she needed for her first semester as a nursing student. Madalyn used the \$250 prize to alleviate some of the financial burden.

Jason Sprague, a liberal studies student and winner of the 2017 Tuition Raffle was one of the presenters at the 2018 Alumni & Friends Organization's Annual Dinner. Sprague read an essay he had written in one of his English classes, sharing his perspective of life as a student with Autism.

The NMCC Foundation exists for the sole purpose of providing support for programs and activities which enhance the quality of education and expand the educational opportunities for students enrolled at Northern Maine Community College.

For more information on establishing memorial gifts, planned giving, estate distribution, or other giving options, please contact the Foundation at: (207) 768-2806.

The NMCC Foundation is a charitable corporation organized under the laws of the State of Maine with tax-exempt status under Section 501(c)3 of the Internal Revenue Code of the United States. The Foundation is legally and fiscally separate from the College. Contributions to the Foundation are tax deductible to the extent allowed by law.

To offer gifts and securities, bequests or pledges over time, please call the Northern Maine Community College Foundation at: (207) 768-2806.

We make every effort to ensure that the information provided in this report is accurate. Please bring errors/omissions to our attention so that we may correct our files. Contact the NMCC Development Office at (207) 768-2806.

All gifts and pledges recognized are for the fiscal year July 1, 2018 through June 30, 2019.

Commemorative gifts

Many times family members and friends choose to make a gift in memory or in honor of a loved one. Most often, gifts are made when someone passes away, but they can also be made in remembrance on an annual basis. This is a special way of creating a lasting dedication.

Special thanks to all who chose this important recognition of the following individuals during the fiscal year:

In Memory Of
Fred Bustard
Mitchell Cyr
Larry Cowett
Lynne Daigle
Harold & Carol Stewart
Kevin Cyr
Matthew Turnbull
Jerome Bell
